

EASY DESIGN CHANGES THAT COULD SAVE YOU MONEY

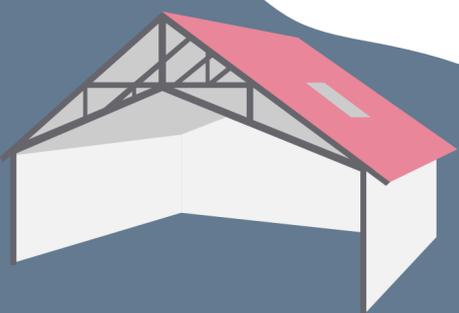

Shape matters

Avoid complicated designs; opting for a simple shape makes it easier and cheaper to build.

The only way is up

Did you know it's cheaper to build up than out?

Truss your instinct

Avoid the large price tag of expensive joinery work and choose scissor trusses.

Opt for roof lights

A single roof light can do the work of a much larger window for a lower cost.

Buy off-the-shelf

Bespoke solutions are far more costly so choose standard sized cabinets, kitchens and doors to save your pennies.
